

BOTOX & FAQS

FREQUENTLY ASKED QUESTIONS ABOUT BOTOX

How long does Botox last?

You can expect Botox results to last anywhere from 3 to 4 months.

When will I see results with my Botox treatment?

Most clients begin seeing Botox treatment results within 5 to 10 days, with full effects at the 2 week mark.

Is one brand or product better than Botox?

Botox Cosmetic is the most popular neurotoxin worldwide. We encourage you to schedule a skin analysis with one of our Expert Medical Injectors so you may determine the treatment that works best for you.

Is it possible to get Botox the day before or the same day as a big event?

Yes, Botox has no significant downtime other than a few possible marks at the injection site (these generally resolve within a few hours). If you are concerned about looking your best before a big event, you may consider scheduling treatment about two weeks in advance for your optimal full treatment effects.

What is the typical recovery time for Botox?

You should be able to resume your normal activity just after receiving Botox treatments. We simply recommend you avoid laying down for 4 hours after treatment and avoid high-impact or strenuous activities (like working out) for 24 hours.

Does it hurt to get Botox?

Patients describe Botox injections like a little "snap" or "pinch" at the injection site. While some clients are more sensitive than others nearly all clients tolerate the treatment well.

How does Botox get rid of wrinkles?

Botox relaxes the movement of the facial muscles that create wrinkles and lines on the face. Botox treatments work by blocking the uptake of acetylcholine by the muscles of the face. Through this process, facial wrinkles soften and may in some cases be eliminated entirely.

Can I get Botox done the same day as another injectable procedure?

Yes, you can receive Botox the same day you receive other injectable treatments. There is no contraindication to receiving multiple treatments to the face on the same day.

What happens if I'm not happy with the results?

CARE Plastic Surgery is focused on your results. If you ever need an adjustment after your Botox treatment, CARE will gladly offer a complimentary correction up to two weeks after your procedure.
